MINI-MAX PNEUMATIC TOOL SUPPLY SYSTEM

PRODUCT DESCRIPTION

☒ The Air Source[®] MINI-MAX is designed and manufactured to be a portable air distribution system for simultaneously supplying multiple pneumatic powered rescue tools at various operating pressures. It can supply such items as Low and High Pressure Air Bags, Air Hammers, Air Chisels, Abrasive cut off saws, pneumatic spreaders, air powered hydraulic power units, and pneumatic powered shoring equipment.

APPLICATIONS

- ☒ Very compact, light weight air supply system carried in a pouch, hard case, or attached to high pressure hose reel.
- ☒ Directly connects to truck high pressure air system via a CGA-346/347 male connector.
- ☒ Equipped with Four (4) individual tool supply outlets, including one (1) dedicated air bag controller supply preset to 115 PSI, and one full manifold pressure outlet for AIR shoring equipment or Pneumatic tools operating at a pressure greater than 175 PSI.
- ☒ Eliminates the need for carrying 4 or 5 regulators and individual supplies for each tool.
- ☒ Adjustable Outlets permit the rescuer to individually control the pressure to the tool connected.

CONSTRUCTION & SPECIFICATIONS

- ☒ 12 ¼" LONG X 12" WIDE X 6" HIGH
- ☒ Weighs only 8.5 lb..
- ☒ Main Manifold Body constructed of 6061-T6 Aircraft Aluminum
- ☒ Anodized a midnight blue color for protection and Anti Oxidation
- ☒ One 115 PSI Air Bag Controller outlet with on/off valve and quick disconnect plug.
- ☒ Two adjustable pressure outlets from 5 PSI to 175 PSI with quick disconnect sockets and gauges.
- ☒ One Full manifold pressure outlet (275-350 PSI) with quick disconnect socket.

OPTIONAL FEATURES

- ☒ High Impact Hard Plastic carrying case
- ☒ Twin High Pressure Inlet Option to allow connection of multiply SCBA cylinders instead of line.
- ☒ Low Pressure Inlet assembly to allow the connection of a low pressure air supplying
- ☒ Various Quick Disconnect Sockets and Plugs
- ☒ Custom Configurations
