

The Odds On Confined Space Survival Just Went Up!

The Difference Is Super Can's Air Source[®] RES-Q

Now...with the Super Can Air Source[®] RES-Q you can begin administering life-saving resuscitation as soon as you reach the victim...and dramatically increase the chances for survival!

Plus...because the Air Source[®] RES-Q uses either airline or reserve cylinder supplied breathing air **COMPLETELY INDEPENDENT** of your SCBA, you can confidently resuscitate in areas in which the use of O₂ is unsafe.

Compact, lightweight, durable, and environmentally and atmospherically safe, the Air Source[®] RES-Q finally brings to industrial and firefighting confined space rescue operations a degree of survivability never before possible. Call, fax, or write now for more information and an on-site demonstration.
